

COPD

This learning programme aims to enable you to interpret and apply clinical guidance to support people living with COPD. You will consider how to optimise their treatment, identify 'red flag' signs and symptoms, collate local resources to support and signpost people living with COPD and use a person-centred approach to empower them to self-manage their condition.

Dates available to book now:
January 9, 16

Dementia

This programme aims to help you apply your knowledge and skills to manage and optimise care for patients living with dementia and their carers. This includes outlining adjustments you could make to improve general practice consultations, discussing anticholinergic burden, the use of antipsychotics and becoming a Dementia Friends Champion.

Dates available to book now:
January 25, 27
February 11, 18
March 18

Deprescribing

In this programme, we will explore how all pharmacy professionals can contribute towards safe and appropriate deprescribing of medicines. You will learn how to recognise a person-centred approach that considers the patient's perspective and experiences and apply a stepwise approach to the process of deprescribing from identification through to reducing or stopping a medicine.

Dates available to book now:
February 19
March 2, 23

EHC

The aim of this programme is to enable pharmacy professionals to acquire the knowledge, develop the skills and demonstrate the behaviours needed to provide high-quality emergency contraception services as part of their pharmacy practice. It is an opportunity to hear from an expert in contraception and sexual health, to reflect on your current practice and share with your colleagues.
